

MAHMOUD SALAH ELFALEH MOHAMED

Flutter Developer

Sohag, Egypt | 01028935376 | mahmoudselfaleh@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Computer Science and Artificial Intelligence student specializing in Flutter and mobile application development. Hands-on experience with Flutter, Dart, REST APIs, Dio, Cubit, Clean Architecture, and Firebase through training and independent mobile projects. Currently training as a Cross Platform Mobile App Developer with DEPI and NTI, and completed a Mobile Development Using Flutter program with ITI. Seeking a Flutter / Mobile Developer internship or junior opportunity.

EXPERIENCE

National Telecommunication Institute (NTI)

Sep 2026 - Present

Creativa Training - Cross Platform Mobile App Development Using Flutter (Training)

- Currently training in Cross Platform Mobile App Development using Flutter and Dart.

Digital Egypt Pioneers Initiative (DEPI)

Aug 2025 - Present

Software Development - Cross Platform Mobile App Developer (Training)

- Building cross-platform mobile applications using Flutter and Dart, covering UI/UX basics, Firebase integration, and Git/GitHub workflows.
- Practicing functional documentation and unit testing alongside mobile deployment for Android and iOS.

Information Technology Institute (ITI)

Jul 2025

Mobile Development Using Flutter (Training) | 120 Hours | Evaluation: 95%

- Trained in Dart and Flutter fundamentals, applying Firebase and API integration concepts in mobile development exercises.

EDUCATION

Assiut National University

Assiut, Egypt

B.Sc. in Computer Science and Artificial Intelligence | Expected 2027

PROJECTS

NewsHub - News Application

Flutter, Dart, Dio, REST API, News API, Clean Architecture

GitHub: <https://github.com/mahmoudelfaleh14/FlutterNewsApp>

- Developed a mobile news application that retrieves articles through a REST API and supports category-based browsing.
- Implemented Clean Architecture to separate data, domain, and presentation layers for maintainability.
- Used Dio for API communication and parsed JSON responses into application models.
- Added loading-state and error-handling logic to improve reliability of data fetching.
- Built and published a release APK; source code available on GitHub.

Skyly - Weather Application

Flutter, Dart, Dio, REST API, Cubit, Clean Architecture

GitHub: <https://github.com/mahmoudelfaleh14/SkylyWeatherApp>

- Built a mobile weather application that retrieves current weather data through a weather API based on city or location input.
- Applied Cubit for state management and Clean Architecture to structure the codebase.
- Handled API requests with Dio and integrated loading and error states for a smoother user experience.
- Designed a dynamic UI that updates based on current weather conditions.

XO Volt - Tic-Tac-Toe Game

Flutter, Dart, Game Logic, Reusable Widgets

GitHub: <https://github.com/mahmoudelfaleh14/xo-volt>

- Independently created a local two-player Tic-Tac-Toe game with a dedicated GameLogic class covering move validation, turn switching, row/column/diagonal win detection, draw detection, winning-cell tracking, and score management.
- Structured the UI into reusable custom widgets (GameBoard, BoardCell, ResultCard) with animated feedback for winning cells.
- Connected splash, home, how-to-play, and play screens via MaterialPageRoute, with results and score-preserving replay.

SKILLS

Mobile Development: Flutter, Dart, Cross-Platform Mobile Development, REST API Integration, Firebase, Dio

UI & Game Development: Reusable Flutter Widgets, UI Development, Animations, Game Logic

Architecture & State Management: Clean Architecture, Cubit, State Management

Programming: C++, Java, Python, Object-Oriented Programming, Data Structures

Databases: SQL, Database Fundamentals

Tools: Git, GitHub

Computer Science: Operating Systems

COURSES & CERTIFICATIONS

- Mobile Development Using Flutter - ITI - Jul 2025 - 120 Hours - 95% Evaluation
- Software Development - Cross Platform Mobile App Developer - DEPI - Aug 2025 - Present
